# GREEN RESOURCE INDEX

## Reducing Your Environmental Impact

The S.C. Department of Health and Environmental Control's (DHEC) Office of Solid Waste Reduction and Recycling (Office) is pleased to present the "Green Resource Index" (Index).

This publication is designed to help business, industry, local government and others locate:

- **recyclers and users of your by-products;**
- **equipment to help minimize your waste;**
- **services to help you become more environmentally friendly; and**
- **substitutes for hazardous materials.**

This publication is printed annually. The online version, however, is updated as needed throughout the year. It can be found by visiting [www.scdhec.gov/recycle](http://www.scdhec.gov/recycle) and clicking on the "Green Resource Index" link under "Related Topics." If you would like to update a listing, report an inaccuracy or need additional help, please call the Office at 1-800-768-7348.

Additional resources from the Office include the:

- **S.C. Smart Business Recycling Program, [www.scdhec.gov/smartbusiness](http://www.scdhec.gov/smartbusiness);**
- **S.C. Green Hospitality Program, [www.scdhec.gov/greenhospitality](http://www.scdhec.gov/greenhospitality); and**
- **S.C. Materials Exchange, [www.scdhec.gov/scme](http://www.scdhec.gov/scme).**

***DHEC does not endorse any of the listings included in the Index.*** It is the responsibility of the users of the Index to confirm that all federal, state and local regulations are met by the contacts made using this Index. The information in this Index is solicited from and provided by the listed organizations.

No charge is made to list the organization and no charge is made for distribution of the Index.

### 'Repurposing' Nearly 100 Years Ago ...

The Kingsford Company was formed by Henry Ford and E.G. Kingsford during the early 1920s. Charcoal was developed from Ford Motor Company's factory waste wood scrap.

**COMMENTS:** EnviroPure's EPW Food Waste Disposal system is a self-contained, continual feed, organic waste disposal system that converts organic food waste – including vegetables, fruits, meat, fish, poultry, dairy products, coffee grounds, bones, shells and pits – into water. Through a hyper-accelerated, natural aerobic decomposition process, organic waste is reduced, generally within 24 hours, to a harmless effluent that is odor free and can be safely disposed of into existing municipal waste water systems. The EPW system can process from 120-14,000 pounds of food waste per day, can be custom configured to fit into any supermarket, commercial or industrial kitchen operation, generates no sludge or odor and requires no clean out. EPW operating costs are significantly less than that of traditional waste disposal and financing is available.
